

IN THE CLAIMS

Amend the claims as follows:

1. (Currently Amended) A packing assembly comprising:
 - (a) a single piece blank folded to define a closed primary container having four peripheral walls with top and bottom end closure flaps, the peripheral walls including a tear strip for selectively separating the container into top and bottom halves, wherein at least two of the peripheral walls of each of the top and bottom ~~[[half]]~~ halves include bowl forming fold lines for forming at least a six sided bowl.
2. (Original) The packaging assembly of Claim 1, wherein the four peripheral walls include a first pair of opposed walls and a second pair of longer opposed walls, the longer walls including the bowl forming fold lines.
3. (Original) The packaging assembly of Claim 1, further comprising a sealed packet within the primary container.
4. (Original) The packaging assembly of Claim 1, wherein the primary container is sealed.
5. (Currently Amended) A container assembly comprising:
 - (a) a sealed outer container having a top wall, a bottom wall and at least two interconnecting side walls, the side walls including a tear strip for separating the container into an upper half and a lower half, at least one of the at least two interconnecting side walls including fold lines to form ~~beveled sections~~ facets within the at least one side wall allowing for the reshaping of the upper half and the lower half; and
 - (b) a sealed inner container encompassed within the sealed outer container.

6. (Currently Amended) A separable bowl forming packaging comprising:

(a) a sealed bowl forming container having a given number of side walls and having a tear strip located to form two separate bowls, each bowl having a sealed end, the sealed bowl forming container including at least one side wall having a bowl forming fold line forming ~~a bowl having~~ at least one of the separate bowls with a periphery defined by a number of facets greater than the number of side walls; and

(b) at least one inner package within the sealed bowl forming container, the inner package including a food product.

7. (Currently Amended) A bowl forming food packaging, comprising:

(a) a closed outer container having a plurality of sides walls, a closed top and a closed bottom, each of the side walls including a tear strip and at least one of the side walls ~~[[wall]]~~ including bowl forming fold lines to define a number of bowl forming facets, the number of bowl forming facets being greater than the plurality of the side walls.

8. (Currently Amended) A blank for forming a separable bowl forming packaging, the blank comprising:

(a) a first section, a second section foldably connected to the first section, a third section foldably connected to the second section and a fourth section foldably connected to the third section ~~Third-Section~~;

(b) each of the first, second, third and fourth sections including a top closure flap, an upper wall panel, a lower wall panel and a bottom closure flap, the upper wall panel and the lower wall panel of each section being spaced by a tear strip; and

(c) at least one each of the upper wall ~~panel~~ panels and lower wall ~~panel~~ panels including at least two bowl forming fold lines to define a bowl periphery having at least five sides.
